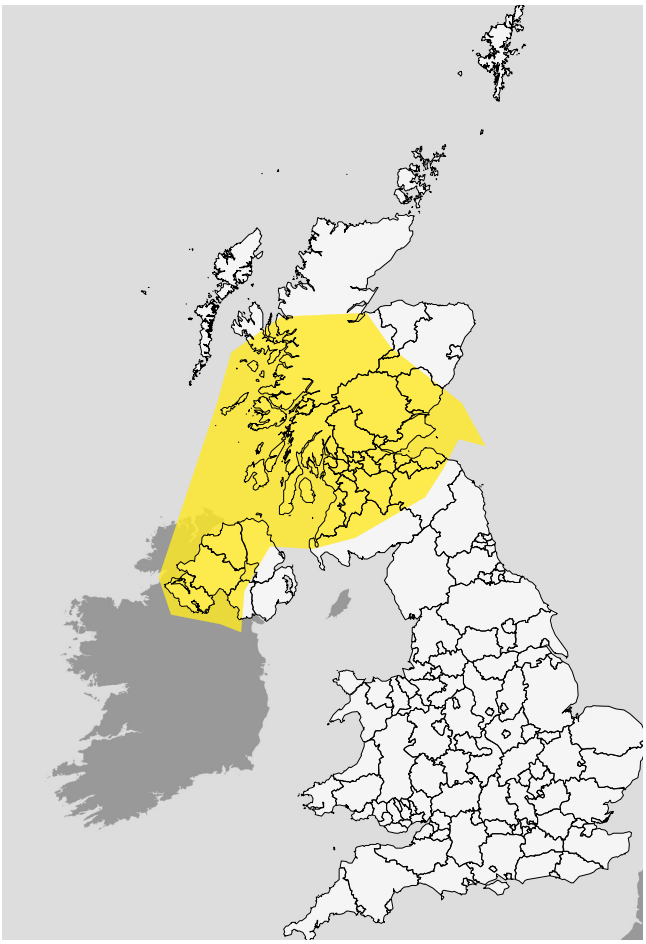
Yellow warning
**Thunderstorm**

Between
**12:00 Mon 10 Aug 2020** and
**23:59 Mon 10 Aug 2020**



## Some places are likely to see severe thunderstorms through Monday afternoon and evening - but there is uncertainty in location and timing.

### What to expect

- There is a small chance that homes and businesses could be flooded quickly, with damage to some buildings from floodwater, lightning strikes, hail or strong winds
- There is a small chance of fast flowing or deep floodwater causing danger to life
- Spray and sudden flooding could lead to difficult driving conditions and some road closures
- There is a slight chance that power cuts could occur and other services to some homes and businesses could be lost
- Where flooding or lightning strikes occur, there is a chance of delays and some cancellations to train and bus services

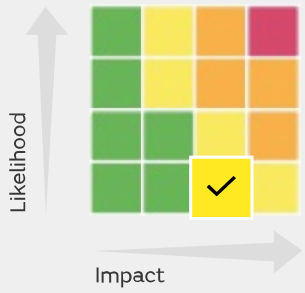
## Further details

Areas of thunderstorms are increasingly likely to develop over the the UK during Monday and move north or north-westwards to affect parts of Scotland and Northern Ireland through the afternoon and evening.

Whilst the most intense thunderstorms, in some instances associated with large hail, will most probably be those triggered by the high temperatures of the day over England and Wales, other areas of storms producing heavy rainfall, frequent lightning and strong gusty winds could move north to affect Scotland and Northern Ireland during the afternoon and evening.

Where the storms occur, rainfall totals of 30-40 mm could fall in an hour, with some locations potentially receiving 60-80 mm in 3 hours, although these will be fairly isolated.



Very low likelihood of medium impacts
